New Insights into the Roles of Cellular Plasticity in Disease

Message from the Guest Editor

Cellular plasticity is the ability of a cell to change its phenotype in response to environmental cues, without a genetic mutation. In pathological conditions, especially neoplasms, plasticity is known to be enhanced.

Phenotypic heterogeneity of diseased cells caused by cellular plasticity is a major barrier to effective therapy. Deciphering the molecular basis of cellular plasticity in each pathological condition has the potential to contribute to novel therapeutic strategies, which could lead to deeper and better clinical responses. In this Special Issue, we will publish reviews and original research that provide new insights into the molecular mechanisms of cellular plasticity in disease.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
