Molecular Defects of Naturally Occurring Mutations

Message from the Guest Editor

Naturally occurring mutations are nature-made experiments that yield novel insights into the physiological functions of the proteins encoded by these mutated genes. Functional studies of the mutant proteins provide important structure–function insights. These studies can be more fruitful than traditional mutagenesis experiments because the mutant proteins have important phenotypes. Mutant proteins can have either loss-of-function or gain-of-function. The studies of these mutant proteins can also point to potential strategies for precision medicine. For example, loss of function mutations can be potentially treated with pharmacological chaperones that correct the misfolding. This Special Issue will provide examples of these aspects of human genetics. Manuscripts dealing with mutations in other animals that have relevance to humans are also welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
