

## Special Issue

# Molecular Research on Skin Inflammation

### Message from the Guest Editor

Skin inflammation is a general term for skin inflammatory diseases caused by various internal and external infections or non-infectious factors, typically characterized by itchiness, redness, and a rash. In this Special Issue, we focus on the molecular-level research of skin inflammation, especially the current molecular mechanism, diagnosis, and treatment of skin inflammation. At the same time, for several types of inflammatory skin diseases, including psoriasis, hidradenitis suppurativa, acne, rosacea, atopic dermatitis, contact dermatitis, stasis dermatitis, and seborrheic dermatitis, this Special Issue will also focus on their molecular pathogenesis and major breakthroughs in treatment. For this Special Issue, we welcome original research and review articles relating to skin infections and inflammation and hope that the proposed theme will be of great interest to the scientific community.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
