## DNA Replication Stress

### Message from the Guest Editor

Dear colleagues, During DNA synthesis in vivo, the replication fork encounters a variety of forms of stress imposed by DNA damage, alternate DNA structures, genetic deficiency, and pharmacologically-induced conditions that ultimately impede fork progression and may lead to the elicitation of signaling cascades. To contend with a variety of different forms of replication stress, eukaryotic cells possess a number of mechanisms involving DNA damage response or DNA repair proteins as well as cell cycle checkpoints to help mediate the appropriate response. This IJMS Special Issue on “DNA Replication Stress” welcomes contributions in all areas that address these mechanisms, mediated at the molecular and cellular levels, to respond to adverse genomic perturbations and cellular conditions so that chromosomal stability and cellular homeostasis is maintained. Dr. Robert M. Brosh Jr

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences, Sez-Biochimica, Faculty of Medicine, Università Politecnica delle Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
