Drought Stress Tolerance in Plants

Message from the Guest Editor

This issue of the *International Journal of Molecular Sciences* journal will focus on recent advances in mechanisms involved in drought tolerance in crop plants with special attention to the role of the root tissue and the shoot-root interaction. In addition to drought, it will consider other abiotic stresses involving water deficit stress at cell level and their interaction with drought.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
