

# Special Issue

## Eph Receptors and Ephrins

### Message from the Guest Editors

Eph receptor tyrosine kinases and their ephrin ligands mediate unique bidirectional signaling that is a major form of contact-dependent communication between cells. For over 30 years, extensive research has revealed many of the underlying molecular mechanisms in Eph/ephrin signaling and how it directs both developmental processes and adult physiology. Nevertheless, major questions remain, including the details of the Eph/ephrin assembly into large signaling clusters, the precise mechanisms of signaling termination, the molecular mechanisms and biological significance of the cross-talk between different Eph family members, and the context-dependence of the signaling, where the same ligand/receptor interactions can elicit diametrically opposite outcomes. This Special Issue will publish research papers and review articles that cover innovative and multidisciplinary approaches to bring about a better understanding of the cellular and molecular mechanisms of Eph/ephrin signaling in health and disease.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
