

Special Issue

Epigenomics in Cancer Research: A Comprehensive Approach

Message from the Guest Editors

This Special Issue is focused on understanding the role of epigenetic mechanisms in cancer development and progression by examining the entire epigenome. This involves investigating various epigenetic markers, including DNA methylation, histone post-translational markers, and other molecular markers and mechanisms such as non-coding RNAs and the chromatin 3D structure. Furthermore, we aim to explore the functional consequences of changes in epigenetic markers by integrating data from other omics layers, such as transcriptomics, proteomics, and metabolomics.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
