Food Toxicants 2.0

Message from the Guest Editor

There are many food toxicants that can be harmful to human health. Food toxicants can be man-made, naturally occurring, or produced during food processing or preservation. This Special Issue will focus on both man-made and naturally occurring toxicants in foods, including mycotoxins, heavy metals, pesticides, food additives, byproducts produced during food processing or preservation, nanomaterials, and any other toxicants present in foods. Chemical, analytical, molecular biological, and biochemical approaches for food toxicants will be welcome. Moreover, in vitro and in vivo mechanistic and toxicity studies will be also welcome.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
