

## Special Issue

# The Role of the IGF Axis in Disease 2.0

### Message from the Guest Editor

This Special Issue is the continuation of our previous special issue "*The Role of the IGF Axis in the Disease*". This research topic aims to highlight the key roles that members of the IGF axis (ligands, IGFbps, and receptors) play in the risk and progression of cancer and how these roles are often exacerbated by disturbed metabolic status. It will encompass their roles in cancer risk and how they utilise the hallmarks of cancer, such as angiogenesis, proliferation, metabolism and survival, to drive tumour development and potential approaches to target this axis.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
