Molecular Imaging in Precision Medicine: A Challenging Alliance

Message from the Guest Editors

Precision medicine represents a novel and revolutionary approach, by which a specific treatment is tailored on the basis of each patient's epigenetic, molecular and environmental characteristics. In this scenario, novel imaging techniques provide a unique opportunity to investigate disease at a molecular level in order to obtain an in vivo characterization. Furthermore, this approach can be applied in a dynamic fashion, using different imaging probes to follow disease evolution during therapy, thus promptly detecting the onset of resistance to a specific drug. Molecular imaging through different techniques (SPECT/CT, PET/CT, optical imaging) has been applied in the field of precision medicine with promising results. In the present Special Issue, we solicit original studies or review articles highlighting the challenging alliance between molecular imaging and precision medicine, with a particular emphasis on the ongoing studies in the less-explored scientific fields, such as the emerging applications of nanotechnology and nanomedicine.

Guest Editors

Dr. Manuel Scimeca

Department of Experimental Medicine, TOR, University of Rome Tor Vergata, 00133 Rome, Italy

Prof. Dr. Luca Filippi

Nuclear Medicine Unit, Santa Maria Goretti Hospital, viale Canova snc, 04100 Latina, Italy

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
