

## Special Issue

# The Interleukins in Health and Disease

### Message from the Guest Editors

Interleukins play central roles in pathological conditions, including infectious diseases, autoimmune diseases, and malignancies. The relationship between autoimmune diseases and interleukins has led to the development of various types of interleukin inhibitors. This Special Issue on “the interleukins” addresses the aforementioned biological activities, production mechanisms, gene regulatory mechanisms, receptor systems, and signal transduction.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
