# Melanosome Transport/Transfer and Melanin Pigmentation in the Skin

### Message from the Guest Editor

Melanin pigments are produced by melanocytes located in the basal layer of the epidermis and are transferred to keratinocytes. Further, melanin pigments are synthesized only in specialized organelles within melanocytes, termed melanosomes. Those melanosomes move along the cytoskeleton to the dendrites of melanocytes and are delivered to surrounding keratinocytes. Improper melanosome trafficking results in hyper- and hypo-pigmentary disorders such as melasma, age spots, Hermansky-Pudlak/Grisicelli syndrome and vitiligo. In addition, in the dermis of post-inflammatory hyperpigmented lesion, the presence of melanophages containing multiple melanosomes are observed occasionally. Many studies have characterized the mechanisms of melanosome transport in melanocytes and melanosome transfer to keratinocytes, but many unknown factors still remain to be clarified. Through the elucidation of these mechanisms, the development of novel remedies for pigmentary disorders is expected.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Inorganic Chemistry)
