Research and Innovations in Green Monomers and Macromolecular Materials

Message from the Guest Editors

Green monomers and macromolecular materials, which include both bio-based and/or biodegradable materials and those that can be recycled, offer significant environmental benefits by reducing dependence on fossil fuels, minimizing waste, and contributing to a circular plastics economy. By promoting the use of sustainable monomers and polymers and encouraging recycling, these innovative materials play a crucial role in addressing the growing concerns over plastic pollution and the need for more eco-friendly alternatives in various industries. In addition to medical applications, green macromolecular materials are increasingly being used as sustainable solutions in consumer and packaging applications, reducing dependence on conventional plastics made from fossil-based resources. This Special Issue aims to present the state-of-the-art advancements in the field of green monomers and macromolecular material, with particular focus on bio-based and biodegradable, but also recyclable, polymers that contribute to the creation of resource-efficient, eco-friendly, and sustainable polymer materials for the circular economy.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
