Zinc-Finger Proteins in Health and Disease: Focus on PRDMs

Message from the Guest Editors

Proteins containing Zinc-finger domain(s) are able to mediate the interaction with DNA, RNA, and other proteins. They are implicated in transcriptional regulation, ubiquitin-mediated protein degradation, signal transduction, DNA repair, cell migration, and numerous other processes. Dr. Erika Di Zazzo

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
