Molecular Targeted Peptides/Chemicals as New Pharmacological Tool in Medicine

Message from the Guest Editor

As we all know the pharmaceutical market has been mainly characterized by active principle ingredients showing a pharmacology activity for a specific pathology but most of the time the molecular mechanism associated with its activity is not clear. Now, the hypothetic way of developing a new drug should follow the basic research, identification of molecular targets, and preparation of potential drug leads able to interact with the molecular target. The research field has become much more sophisticated, with opportunities to study new therapeutic approaches in a more specific way as it is shown from newly published molecules, such as cell-permeable peptides (CPPs), targeted peptides, small molecules, antibodies, etc. Therefore, this Special Issue will publish cutting-edge research in this field and so we are calling for contributions from any authors active in this field.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
