

Special Issue

Molecular Diagnosis and Treatments of Diabetes Mellitus

Message from the Guest Editor

In recent years, several studies conducted among different populations, as well as on mice, have revealed new knowledge about the role of neurotransmission and inflammation in type 2 diabetes mellitus (T2DM) that is not currently included in protocols. This Special Issue invites research papers to highlight the involved DM molecular markers and pathways and outline perspectives for personalized DM diagnosis and treatment. Systemizing reviews on these topics are also warmly welcome.

Guest Editor

Dr. Mihail Virgil Boldeanu

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
