

## Special Issue

# Molecular Research on Pharmacogenetics

### Message from the Guest Editor

Rapid advances in genomic technologies and molecular biology, such as DNA chips or microarray technology, allows for expanding pharmacogenetic testing from individual variants to entire genes, enabling the discovery of rare variants and new variant/gene drug associations. This has led to the transformation of pharmacogenetics into a key field of multidisciplinary research for the application of personalized medicine. This Special Issue aims to discuss developments in pharmacogenetics methodology and how these developments have made it possible to assess the full extent of pharmacological variants and improve the identification, functional validation and mechanistic understanding of the interplay between genes and drugs.

---

### Guest Editor

Dr. Stefania Cheli

Pharmacovigilance & Clinical Research, International Centre for Pesticides and Health Risk Prevention, Fatebenefratelli-Sacco Hospital, University of Milano, 20122 Milano, Italy

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore  
- Q1 (Inorganic Chemistry)
