The Molecular Link between Nutrition and Obesity

Message from the Guest Editor

The molecular link between diet and obesity is a complex interaction involving genetic and epigenetic factors, hormonal regulation (insulin, leptin, and ghrelin), adipokines (e.g., adiponectin and resistin), and environmental factors that regulate energy balance and metabolism. Obesity is associated with chronic low-grade inflammation, and the adipose tissue of obese individuals secretes pro-inflammatory cytokines (e.g., TNF- α and IL-6) that may impair insulin signaling and contribute to metabolic dysfunction. In addition, the composition of the gut microbiota may influence dietary energy expenditure, inflammation, and fat accumulation. Together, these mechanisms contribute to the development of obesity. Nutritional interventions targeting these pathways, such as diets low in refined sugars and high in fiber, may help alleviate obesity by modulating these molecular processes .

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
