Molecular Research of Urology 2022

Message from the Guest Editor

Molecular technology platforms have exponentially developed to a status where pathologies can be profiled at various levels. In this Special Issue, we invite you to submit manuscripts related new progress of urology research. We invite both oncological and non-oncological papers. Topics to be considered include, but are not limited to, precision medicine in GU oncology, new molecular therapeutical targets, biomarkers for non-oncological bladder disease, and advances in molecular tissue engineering. The investigations we will focus our attention on are fundamentally cellular/molecular studies, papers only contain clinical trials/data are not acceptable.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
