Pathophysiology and Therapy of Bladder Function Disorders and Cystitis

Message from the Guest Editor

Patients with bladder disorders are overlooked in clinic today. The current knowledge of the pathophysiology of bladder disorders may not fully allow differential diagnosis of lower urinary tract symptoms, let alone treatment. Through investigating the molecular mechanisms in humans and animal models, appropriate therapeutic strategies could be applied on those patients with bladder disorders and cystitis. In this Special Issue, we encourage researchers to report the pathophysiology and treatment strategies in functional bladder disorders through an overactive bladder to an underactive bladder. This Special Issue will give an overview of recent advances in difficult issues of cystitis, such as intractable bacterial cystitis, chronic pelvic pain syndrome, ketamine cystitis, interstitial cystitis, and irradiation cystitis. The goal of this issue is to be beneficial for scientists, urologists, and physicians. Original articles and comprehensive reviews in the topic that focus on molecular research are warmly welcomed.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Inorganic Chemistry)
