

Special Issue

Vibrational Spectroscopy Methods to Investigate Macromolecules

Message from the Guest Editor

We are delighted to announce a call for submission to a Special Issue of the *International Journal of Molecular Sciences* dedicated to the investigation of the chemical conformation of macromolecules via vibrational spectroscopies. In combination with the standard microscopical techniques such as TEM, SEM AFM, etc., FTIR and Raman (in particular, SERS, TERS and Resonant Raman), are often used to disentangle the macromolecules chemical constitution, often corroborated with conventional absorption and fluorescence measurements. We encourage the submission of original research articles and topical reviews, both theoretical and experimental, on all aspects of spectroscopically investigation of macromolecules, from FTIR to Raman, spanning from biomolecules (DNA, proteins) to organic semiconductors and polymers, with particular attention to green chemistry.

Guest Editor

Dr. Francesco D'Amico

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
