

## Special Issue

# Advances in Diabetic Ischemic Heart Failure

### Message from the Guest Editor

In patients with diabetes mellitus, rapid progression of atherosclerosis can lead to spectrum of cardiovascular diseases including chronic and acute forms of coronary artery disease, as well as ischemic cardiomyopathy and heart failure. Over the last 5–10 years we have witnessed on one of the major advances in the field of cardiology regarding new treatment modalities in patients with heart failure. In fact, application of new glucose-lowering drugs—sodium/glucose-co-transporter-2 (SGLT2) inhibitors and glucagon-like peptide-1 (GLP1) receptor agonists—has further promoted interest in the management of patients with diabetes, ischemic heart disease and heart failure. Determining the best molecular diagnostic, therapeutic and revascularization strategy with diabetes, ischemic heart disease and heart failure remains one of the most challenging issues in current cardiology treatment.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
