Investigation of Natural Products as Sources of Bioactive Molecules, 2nd Edition

Message from the Guest Editor

Natural products can derive from plants and animals, and considering their rich composition, they certainly represent an inexhaustible source of high-potential substances that can be exploited in multiple sectors. Their various physiological and biological activities are based on their specific chemical structures. However, the process of identifying bioactive components from natural product mixtures can be quite difficult since many of them are quite complex. For the purposes of chemical characterization, various extractive and analytical techniques are applied for the detection and identification of the constituent molecules. Based on the bioactivity exerted by most of the molecules that characterize natural products, in recent years, there has been a growing interest in the study of biological activities such as antioxidant, antibacterial, cytotoxic, anti-inflammatory activities, and so on. This Special Issue welcomes original research and reviews on topics such as methods for the extraction and characterization of bioactive molecules from natural products, including those associated with the evaluation of their biological properties.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Inorganic Chemistry)
