Antitumor Properties of Nanoparticles

Message from the Guest Editor

Despite developments in medicine and diagnostic fields, tumors remain among the leading causes of death throughout the world. Nanoparticles have been explored for biomedical applications, and are considered as a possible choice for experimental tumor therapies and drug delivery strategies. The unique properties of nanoparticles and the possibility of chemical modification and attachment of active substances allow the materials to be well-adapted to targeted antitumor therapies. Despite the great interest, the use of nanoparticles in antitumor therapies requires further research, particularly regarding the understanding of their biological interactions and distribution in the body and individual tissues. Therefore, authors are invited to submit original research and review articles on the antitumor properties of nanoparticles and nanoparticles conjugates. Topics include, but are not limited to:

- Toxicity;
- Interactions with cell cycle and biological pathways;
- Regulation of key tumor physiology processes including migration, invasiveness, autophagy, and angiogenesis;
- Interaction with the tumor microenvironment;
- Distribution in tissues and model organisms.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
