

## Special Issue

# Pathomechanisms of Atherosclerosis. Part I

### Message from the Guest Editor

With the recent globalisation of life style in many parts of the world, atherosclerosis has become a global disease with a significant health threat and economic burden, not only in the West, but now also Asia and Africa.

Despite the well documented conventional risk factors for atherosclerosis, little is known about the major differences between geographical regions and whether the effect of those factors remains at a similar level of impact in all nations. This also raises the question about the exact pathomechanism of atherosclerosis and if it is uniform or may have different pathways between continents and countries. Furthermore, whether the pattern of gross pathology, e.g., thickened intima-media, plaque formation, calcification, etc., has become amenable to study and to accurately analyse, is not known; is it nation specific? Prof. Dr. Michael Henein

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
