Targeting Breast Cancer: Strategies and Hopes

Message from the Guest Editors

Breast cancer therapeutics has evolved rapidly within the last decade as a result of the improvements in the understanding of the molecular biology of the disease. However, there is still an unmet need to improve treatments, especially for more aggressive histologies of the disease. Novel drugs have significantly increased rates of disease-free survival and overall survival of the patients. In parallel, we have recognized categories of patients where de-intensification of treatment results to similar oncological outcomes while sparing patients from toxicities related to treatment. In addition, molecular data that could guide us regarding treatment sequence and possible combinatorial approaches could be of benefit. Further understanding of the molecular biology of the disease could provide insight for combinations of immunotherapeutic and targeted agents that could further improve responses and prolong survival. A new, fascinating era has begun regarding the molecular research of breast cancer. The current Special Issue welcomes innovative research that could further promote our knowledge in this field and lead to the development of novel therapeutic agents.

Guest Editors

Prof. Dr. Christos Papadimitriou

Prof. Dr. Flora Zagouri

Dr. Michalis Liontos

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
