Cellular Oxygen Homeostasis

Message from the Guest Editor

Oxygen facilitates an effective production of the cellular energy currency ATP. Cells sense and respond to the partial pressure of oxygen in their environment using a cell-type specific toolkit of oxygen-sensitive ion channels, receptors, second messengers, transcription factors, and other enzymes. Cellular oxygen homeostasis is a prerequisite for proper cellular function and survival, and both under-supply and excess of oxygen induce oxidative stress. Dysregulation induces increased formation of reactive oxygen species, which override the redox buffering capability and modify lipids and proteins. The changes in enzymatic activity can affect all aspects of cellular function, including metabolism, development, and differentiation, cellular secretions, as well as epigenetic mechanisms and gene expression. We cordially invite interested investigators in this field to contribute Original Articles or Reviews to this Special Issue with a focus on molecular mechanisms of cellular responses to different oxygen conditions, whether it be with the help of in vitro models, animal models or in humans, which might provide insight into clinically relevant questions.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore
- Q1 (Inorganic Chemistry)
