

Special Issue

EPR Spectroscopy: Applications for Metal Sites in Biological Systems—William E. Antholine at 75

Message from the Guest Editors

In my role as the “metal person” at the National Biomedical EPR Center at the Medical College of Wisconsin, I have collaborated with outstanding scientists, nationally and internationally, for more than 40 years. These collaborations have resulted in more than 200 publications of research articles and chapters. As I turned 75 years old, it occurred to me that I would like to publish several of my latest research studies and the research of others, both well known to me and unknown to me, in a Special Issue. The main requirement is that there is at least one EPR spectrum in each article. While I am best known for publications using low frequency EPR of cupric sites including sites in prions, antitumor agents, cytochrome, c oxidase, nitrous oxide reductase, and particulate methane monooxygenase, I intend to submit articles with cobalt and chromium EPR spectra. I encourage authors to submit papers on their main interests and also new interests.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle
Marche, Via Ranieri 65, 60100 Ancona, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
