

# Special Issue

## Kinase Signal Transduction 1.0

### Message from the Guest Editor

Protein kinases phosphorylate a wide variety of substrates, the phosphorylation of which changes their conformation, activity, stability, intracellular localization, and affinity to other molecules. Therefore, protein kinases are critical for various biological functions and cellular processes, such as signal transduction, transcription, protein degradation, vesicle transport, cell growth and death, stress response, immunoregulation, and metabolism. This Special Issue, “Kinase Signal Transduction”, welcomes contributions in all areas of recent and current research associated with novel physiological and pathological functions and regulatory mechanisms of protein kinases, as shown above.

---

### Guest Editor

Prof. Dr. Atsushi Matsuzawa

Laboratory of Health Chemistry, Graduate School of Pharmaceutical Sciences, Tohoku University, 6-3 Aoba, Aramaki, Aoba-ku, Sendai, Miyagi 980-8578, Japan

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Editor-in-Chief

Prof. Dr. Maurizio Battino

Department of Odontostomatologic and Specialized Clinical Sciences,  
Sez-Biochimica, Faculty of Medicine, Università Politecnica delle  
Marche, Via Ranieri 65, 60100 Ancona, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
