

## Topical Collection

# Sphingolipid Signaling in Health and Disease

### Message from the Collection Editor

This Topical Collection is dedicated to shedding light on the molecular mechanisms used by bioactive sphingolipids, including sphingosine, ceramides, glycosphingolipids, and phosphorylated sphingoids, and to better characterize their involvement in physiological, pathophysiological, and pathological conditions. Furthermore, advances in the development of new drugs and strategies to manipulate sphingolipid-regulating enzymes and receptors for therapeutic applications are welcome.

## About the Journal

### Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, MEDLINE, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Inorganic Chemistry)
