

Special Issue

Molecular Research on Urology

Message from the Guest Editors

Molecular technology platforms have exponentially developed to a status where individual patient-acquired pathologies can be profiled at various levels. Where does the technology meet unmet clinical needs? In this Special Issue, we invite you to submit manuscripts that illustrate the clinical utility and impact of molecular research into clinical urological practice. We invite both oncological, as well as non-oncological papers. Topics to be considered include, but are not limited to, precision medicine in GU oncology, new molecular therapeutical targets, biomarkers for non-oncological bladder disease, and advances in molecular tissue engineering.

About the Journal

Message from the Editor-in-Chief

The International Journal of Molecular Sciences (*IJMS*, ISSN 1422-0067) is an open access journal, which was established in 2000. The journal aims to provide a forum for scholarly research on a range of topics, including biochemistry, molecular and cell biology, molecular biophysics, molecular medicine, and all aspects of molecular research in chemistry. *IJMS* publishes both original research and review articles, and regularly publishes special issues to highlight advances at the cutting edge of research. We invite you to read recent articles published in *IJMS* and consider publishing your next paper with us.
