Special Issue

Fault Diagnosis, Maintenance and Reliability

Message from the Guest Editors

This Special Issue invites original research papers that report on the state-of-the-art and recent advancements in fault diagnosis, maintenance and reliability. The scope of this Special Issue encompasses applications in engineering, mechanical engineering, electrical engineering, instrumentation, thermal imaging, measurement, acoustics. Prof. Grzegorz KrolczykDr. Jerzy Jozwik Keywords

- fault diagnosis
- machine
- reliability
- maintenance
- signal processing
- measurement

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo
School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:
CiteScore - Q2 (Information Systems)
