

Special Issue

Knowledge Graph Technology and its Applications II

Message from the Guest Editor

MDPI's *Information* journal is introducing a new Special Issue. Original papers related to knowledge graph technology and its applications will be considered for publication. This Special Issue aims to bring together researchers in the knowledge graph research community to present innovative research results or novel applications. In this Special Issue, we solicit papers on various aspects of knowledge graph technology from various fields, such as the semantic web, knowledge engineering, ontology, natural language processing, machine learning, and novel applications of knowledge graph technologies to promote research activities in these fields.

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

CiteScore - Q2 (Information Systems)
