

Special Issue

Neural Natural Language Generation

Message from the Guest Editors

Special Issue "Neural Natural Language Generation" has been OPEN! The goal of this Special Issue of *Information* is to map the recent advances in neural natural language generation, along three main axes: i) architectural (e.g., end-to-end vs. modular); ii) teleological (e.g., task-based vs. generalist); iii) cognitive (e.g., plausible vs. agnostic models). We welcome contributions on topics such as, but not strictly limited to:

- multilingual neural NLG
- neural generation in dialogue systems
- neural generation for machine translation
- end-to-end neural NLG
- modular architectures for neural NLG
- management of hallucinations in neural NLG
- evaluation of neural NLG systems
- applications of neural NLG

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

CiteScore - Q2 (Information Systems)
