

Special Issue

Systems Engineering and Knowledge Management

Message from the Guest Editor

This Special Issue intends to publish a novel and original work focused on the mutual connection of SE and KM as outlined above. Prospective authors are anticipated to deal with various aspects of SE as an integrative approach, ranging from project management issues and requirements gathering to technical development and coordination of experts during the development of knowledge systems regardless of the level of their hardness or softness. In this way, an engineered system is considered a system, a technological or organizational one, engineered for work with knowledge in the broad sense of its understanding. Topics for this Special Issue are (but are not limited to):

- systems engineering methodologies
- systems engineer
- knowledge engineering
- knowledge management process
- knowledge and expert systems
- system life cycle
- systems design and development
- systems engineering and project management
- validation and verification processes
- requirement management
- modeling and simulation

About the Journal

Message from the Editor-in-Chief

The concept of *Information* is to disseminate scientific results achieved via experiments and theoretical results in depth. It is very important to enable researchers and practitioners to learn new technology and findings that enable development in the applied field.

Information is an online open access journal of information science and technology, data, knowledge and communication. It publishes reviews, regular research papers and short communications. We invite high quality work, and our review and publication processing is very efficient.

Editor-in-Chief

Prof. Dr. Willy Susilo

School of Computer Science and Software Engineering, University of Wollongong, Northfields Avenue, Wollongong, NSW 2522, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Ei Compendex, dblp, and other databases.

Journal Rank:

CiteScore - Q2 (Information Systems)
