Selected Papers from the 8th Civil Structural Health Monitoring Workshop

Message from the Guest Editors

The 8th Civil Structural Health Monitoring Workshop (CSHM-8) represents a forum where experts from around the world discuss the latest advancements and breakthroughs in the field of civil structural health monitoring (SHM) and more broadly in the fields of smart materials and intelligent systems for civil engineering applications. The Workshop also fosters the discussion and identification of key and emerging challenges and opportunities in research, development, and field applications of SHM to civil structures and infrastructures. The CSHM-8 workshop is also intended to promote communication exchange and cross-fertilization among researchers and practitioners from all around the world sharing their expert knowledge in the field. Theoretical as well as applicative contributions focused on SHM of existing and/or historical structures and infrastructures exposed to natural or human-made hazards are welcome.

Guest Editors

Dr. Carlo Rainieri

Prof. Dr. Giovanni Fabbrocino

Dr. Filippo Santucci de Magistris

Dr. Matilde Antonella Notarangelo

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article, review or short communication for consideration and publication in *Infrastructures* (ISSN 2412-3811). There is no restriction on the length of the papers. *Infrastructures* is published in open access format. The scientific community and general public have unlimited free access to the content as soon as it is published. *Infrastructures* is supported by the authors by the payment of article processing charges for accepted manuscripts. Please consider *Infrastructures* as an exceptional opportunity to publish your work.

Editor-in-Chief

Dr. Pedro Arias-Sánchez

Applied Geotechnologies Group, Department of Natural Resources and Environmental Engineering, School of Mining Engineering, University of Vigo, 36310 Vigo, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Civil) / CiteScore - Q1 (Building and Construction)
