

## Special Issue

# Recent Advances in Fall Armyworm Research

### Message from the Guest Editors

The fall armyworm, an invasive pest from the Americas, is rapidly spreading through the Old World. It has a wide range of hosts and catastrophic destructive capability—it has about 353 host species, remarkably corn, with 15–73% of the yield loss of corn caused by its higher-instar larva. In this Special Issue we review the most up-to-date research developed for the biology, ecology and control of this pest.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological  
Sciences Building, Athens, GA 30602-2603, USA

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, PubAg, and other databases.

##### Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 17 days after  
submission; acceptance to publication is undertaken in 2.8  
days (median values for papers published in this journal in  
the first half of 2024).
