

Special Issue

Honeybee Neurobiology and Behavior

Message from the Guest Editors

Insects are model systems in research on the neural basis of behavior and animal cognition. Processes underlying sensory perception, learning, memory and high-order integration have been studied most successfully in insects. Among them, Hymenoptera have been most intensively used to unravel the mechanistic basis of cognitive processes. This special issue will report recent discoveries and review key subject areas in the field of insect neuroscience.

Guest Editors

Prof. Dr. Randolph Menzel

Prof. Dr. Martin Giurfa

Dr. Jean-Christophe Sandoz

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Brian T. Forschler
Department of Entomology, University of Georgia, 413 Biological
Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 17 days after
submission; acceptance to publication is undertaken in 2.8
days (median values for papers published in this journal in
the first half of 2024).
