

Special Issue

Biological Control and Insect Pathology

Message from the Guest Editors

Microbial Control is a strongly growing sector within the framework of Biological Control. Integrated Pest Management methods need to be developed to avoid the widespread use of insecticides and to minimize effects on non-target organisms. Studies on approaches, including the use of microbial insecticides and entomopathogens (fungi, viruses, bacteria, nematodes, protozoa) go in this direction. The articles in this Special Issue will focus on the different fields of Insect Pathology in Biological Control and the author scientists could contribute with their expertise to provide an update to the current Microbiological Control Panel.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Brian T. Forschler
Department of Entomology, University of Georgia, 413 Biological
Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,
PMC, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 16.7 days after
submission; acceptance to publication is undertaken in 2.4
days (median values for papers published in this journal in
the second half of 2024).
