Special Issue

Management of Wood-Attacking Insects

Message from the Guest Editors

Wood is the most abundant biomass resource on the earth, and has been used throughout human history as an environmentally-friendly material. Wood-attacking insects are rich in diversity and abundance in tropical and sub-tropical countries, and the recent increase in global wood imports and exports has accelerated the invasion of these cryptic pests into new areas. This Special Issue of *Insects* will feature original research articles and reviews by leading research entomologists, wood scientists, and associated experts. Articles will focus on the biology, ecology, and physiology of current and emerging pest species and sustainable best practices for their management. Dr. Vernard Lewis

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Brian T. Forschler

Department of Entomology, University of Georgia, 413 Biological Sciences Building, Athens, GA 30602-2603, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Entomology) / CiteScore - Q1 (Insect Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024).
