

## Special Issue

# Implantable Cardioverter Defibrillator (ICD) in Cardiac Disease

### Message from the Guest Editor

Novel medical therapies and new interventional approaches to cardiac disease have currently changed our medical approach to patients with heart disease. However, the risk of ventricular arrhythmias and sudden cardiac death (SCD) are still a key element that every physician need to face in their patients. We set up this Special Issue in order to highlight new scientific development on risk stratification and prevention of sudden cardiac death. Therefore, for this Special Issue, we would like to select papers regarding new methodologies for risk stratification of sudden cardiac death, new insights on the use of implantable Cardioverter Defibrillator (ICD) and future approaches to the prevention of SCD.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Thomas Brand  
National Heart & Lung Institute, Imperial College London, South  
Kensington Campus, London SW7 2AZ, UK

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed,  
PMC, Embase, CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Cardiac and Cardiovascular Systems) /  
CiteScore - Q2 (General Pharmacology, Toxicology and  
Pharmaceutics )

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 22.9 days after  
submission; acceptance to publication is undertaken in 2.6  
days (median values for papers published in this journal in  
the first half of 2024).
