

Special Issue

Effect of Long-Term Insomnia on Mental Health

Message from the Guest Editor

Over the past decade, world peace has been disrupted by the COVID-19 pandemic, war, and natural disasters resulting from climate change. All these changes, combined with changes to civilization, have caused anxiety that has reduced people's subjective well-being across the globe, especially teenagers and adults. The purpose of this Special Issue is to explain mental health problems in relation to chronic sleep disorder. Among sleep disorders, insomnia is the most prevalent and exhibits a high co-morbidity profile. Studies have acknowledged insomnia as a predictor of serious clinical conditions, such as depression, anxiety, and cognitive impairment. Long-term insomnia rates have been linked to multiple conditions, including mental disorders. This indicated that insomnia is a worldwide public and economic health burden, and suggests that targeting insomnia would help in preventing the progression and reducing the risks of mental disorders. We welcome original cross-sectional studies, longitudinal and experimental studies, literature reviews, systematic reviews, and meta-analyses that are in line with our aims.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
