Aortic Aneurysm: Latest Insights into Therapeutic Approaches

Message from the Guest Editors

Aortic aneurysmal disease is a potentially life-threatening condition, and its prevalence is expected to grow with the increase in the elderly population due to prolonged life expectancy. Thus, the demand for vascular procedures will inevitably rise worldwide. Over the last two decades, endovascular treatment has evolved to become the treatment of choice due to its associated low morbidity and mortality, while the procedure has been subjected to various refinements with new devices and techniques. Additionally, pre-, peri- and post-operative technological advancements have also improved and new insights have appeared in various fields (imaging, software process, diagnostic tools, perioperative protective measures, and follow-up procedures). This Special Issue aims to provide an update of new insights into diagnostic and therapeutic approaches, focusing on the whole area of aortic aneurysm management, including perceptions of new technologies and novel devices. Accordingly, this Special Issue will provide a forum for high-quality original research and review articles with up-to-date evidence and knowledge.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
