Rheumatoid Arthritis: Clinical Updates on Diagnosis and Treatment

Message from the Guest Editor

Over the past two decades, significant advances have been made in the management of rheumatoid arthritis (RA). Early diagnosis, the prompt initiation of pharmaceutical therapies, and the application of a treat-to-target strategy with tight disease control have greatly improved the long-term outcomes of patients with RA. A growing array of conventional, biological, and nonbiological targeted disease-modifying antirheumatic drugs (DMARDs) are available in the current pharmaceutical approach. Despite this remarkable therapeutic revolution, we are confronted by many difficulties in our daily practice of managing patients with RA. The aim of this Special Issue is to provide new information concerning diagnosis and treatment strategies using targeted therapies with biological and nonbiological DMARDs. I welcome original research papers, reviews, meta-analyses, and communications that will contribute to optimizing the use of the existing DMARDs and developing new ideas and future research directions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
