Targeted Treatment in Inflammatory Bowel Diseases (IBD)

Message from the Guest Editors

Inflammatory bowel diseases (IBD) constitute a complex group of diseases that require targeted treatment approaches to improve patient outcomes and minimize side effects. This Special Issue welcomes original research articles, reviews, and perspectives that focus on the development, optimization, and clinical translation of targeted treatments for IBD. We encourage submissions that cover topics including but not limited to the molecular mechanisms of IBD pathogenesis, the identification and validation of potential targets, the design and testing of novel drugs or biologics, the evaluation of biomarkers or imaging techniques for personalized therapy, and the outcomes and challenges of clinical trials. However, mini-reviews and case reports will not be considered. This Special Issue is expected to contribute to advancing the knowledge and practice of targeted treatment in IBD and promoting dialogue among researchers, clinicians, and patients. *Please click [here](#) to find more information*

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
