Clinical Advances in Aortic Disease and Revascularization

Message from the Guest Editor

Demographic changes have led to much older patients with a range of comorbidities, often with limited operability, and new questions, such as those of the patient's quality of life vs. overall survival, have arisen. Major randomized controlled trials investigating the outcomes of endovascular vs. non-operative vs. open-surgical treatment no longer fully reflect the realities of today, and new, more real-world-focusing approaches are needed, including registry data, artificial intelligence, Bayes statistics or other prediction models enabling clinicians to judge with empathy and intuition, supported by patient-individual prognosis. Moreover, new contrast media and radiation-sparing technology, such as intravascular ultrasound, image fusion and virtual reality, will rapidly bring about new perspectives for the treatment of difficult anatomies. Last but not least, the molecular base of ADs will fundamentally change our point of view, since the course of AD has to be associated with a specific etiology rather than with the morphology (i.e., diameter) alone.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
