

Special Issue

Current and Emerging Treatment Options in Dental Implantology

Message from the Guest Editors

This Special Issue aims to explore the current and emerging treatment options in the field of dental implantology. It will cover a wide range of topics related to different applications of dental implants in dentistry and maxillofacial surgery. These include but are not limited to:

- Surgical techniques and advancements in implant placement;
- Bone augmentation and regeneration strategies;
- Immediate loading protocols and accelerated implant therapy;
- Prosthetic options and innovations in implant-supported restorations;
- Dental implants as anchorage devices in orthodontics.

We invite original research articles, systematic reviews, meta-analyses, and clinical trials that contribute to the understanding and advancement of treatment options in dental implantology. However, please note that mini-reviews and case reports will not be considered for this Special Issue. We look forward to receiving submissions that contribute to the advancement of treatment strategies in dental implantology and ultimately improve patient care.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
