Recent Advances in Pulmonary Embolism and Thrombosis

Message from the Guest Editors

Pulmonary embolism (PE) and thrombosis are serious conditions that involve the formation of blood clots in the lungs or other parts of the body. Anticoagulant therapy remains the mainstay of treatment for PE and thrombosis. In cases where anticoagulation alone is insufficient or contraindicated, interventional procedures, such as catheter-directed thrombolysis or surgical embolectomy, may be considered. These procedures aim to remove or dissolve clots, restoring blood flow and preventing further complications. Despite the advances in the diagnosis and treatment of pulmonary embolism and thrombosis that have been made over recent years, challenges remain in the management of PE and thrombosis. These include prevention, treatment, and management for patients with pulmonary embolism and thrombosis. This Special Issue aims to report the latest research on pulmonary embolism and thrombosis. We would like to cordially invite you to submit your manuscripts for review and publication in the Journal of Clinical Medicine, to improve clinical outcomes as well as ensure optimal short- and long-term management.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
