Clinical Updates on Bariatric Surgery

Message from the Guest Editors

Obesity is currently considered a global epidemic condition, and bariatric surgery is one of the most effective available treatments, in addition to lifestyle changes. In this respect, thousands of bariatric procedures (restrictive, malabsorptive, and mixed) are currently performed around the world with exponentially increasing trends and outcomes. During the past several years, intense scientific activities in this field have been realized, allowing us to obtain more in-depth knowledge of the effect of bariatric procedures on obesity comorbidities, a more complete view on perioperative complications, medium-term effectiveness, and new bariatric surgery techniques, among others. The scope of this topical collection is to provide an overview of recent advances in the field of bariatric surgery. Therefore, we encourage researchers in the field of bariatric surgery to submit an original article (no animal research) or review to this topical collection (case reports and short reviews are not accepted).

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
