Disorders of the Immune System in Pregnancy

Message from the Guest Editors

Pregnancy is characterized by a unique immunological environment characterized by the suppression of a variety of cell- and antibody-mediated mechanisms to accommodate the fetus and allow pregnancy continuation. This may explain the remission of some autoimmune disorders during pregnancy and also the increased incidence of complications in women with active disease at the time of conception or disease upturn at any point of gestation. Almost all organs and systems can be affected, and several pregnancy-specific complications can occur in pregnant women with autoimmune disease. The fetus is not exempt given that the transplacental passage of maternal auto- and alloantibodies may be responsible for the damage of fetal tissues and cells such as *erythrocytes* and *platelets*. The aim of this Special Issue is to present novel and high-quality research in the field and highlight the most up-to-date evidence in the context of diagnosis, management, and prognosis of various disorders of the immune system, potentially leading to maternal and fetal complications during pregnancy.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.3 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
